

**Location:**

Houma, LA

**Date of Application:**

December 2007

**Market:**

Oil and Gas (Offshore)

**Substrate:**

Steel

**Surface Prep:**

SSPC-SP 5 (White Metal Blast)

**Exposure:**

Exterior Weathering - severe industrial  
- seacoast and chemical environment

**Square Feet:**

70000.0

## ATP High Island

**Area Coated: Exterior Coating**

- First Coat: Carbozinc 11
- Second Coat: Carboguard 893
- Third Coat: Carbothane 134 HG
- Fourth Coat: Carboguard 1209

**Project Description:**

The ATP High Island project is a 4 pile production deck. All structural steel, piping and production equipment was coated with the same system.

**Coating Selection Explanation:**

This is a typical new construction project. No coating problems were experienced. The specified coating system has years of proven experience.

**Additional Information:**

Carboguard 1209 was used on all deck areas (walking, production, work areas). ATP had previously used Ameron for new construction projects. Customer was very satisfied with our products and service.
