300000.0

BP Horn Mountain - Topsides

Area Coated: Exterior Coating

- First Coat: Carbozinc 11
- Second Coat: Carboguard 893
- Third Coat: Carbothane 134 HG

Project Description:

This oil and gas production facility, located in the Gulf of Mexico, is a truss SPAR design. The project which was close to 30,000 sq. ft. and used 6,000 gallons of paint, was a difficult one to complete.

Additional Information:

Project manager, inspectors, and paint superintendent were all very pleased with our effort. We were the only componet that stayed on schedule the entire job. There were no delays in supply.
