

Location:

Houma, LA

Date of Application:

August 2008

Market:

Oil and Gas (Offshore)

Substrate:

Steel

Surface Prep:

SSPC-SP 5 (White Metal Blast)

Exposure:

Exterior Weathering - severe industrial
- seacoast and chemical environment

Square Feet:

20000.0

Tamboua Landana

Area Coated: Exterior Coating

- First Coat: Carboguard 1207
- Second Coat: Carbothane 134 HG

Project Description:

The splash zone area (+ 10 to - 10) was coated with our Carboguard 1207 at a dry film thickness of 125 to 150 mils. The Carboguard 1207 was coated with our Carbothane 134HG to meet a specified color (C - 705).

Coating Selection Explanation:

The splash zone area requires a coating with high abrasion resistance. Our Carboguard 1207 met the requirements of Chevron for this application.

Additional Information:

Gulf Island used a quikspray hopper unit with a pole gun for this application.
