Exterior Weathering - moderate  
industrial exposure - chemical  
environment

## Basic Electric-Antelope Valley Station

**Area Coated: Exterior Coating**

- First Coat: Rustbond
- Second Coat: Carbomastic 15
- Third Coat: Carbothane 133 HB

**Project Description:**

This job included several different aspects: conveyors, air vents, and a bag house.

**Additional Information:**

The customer was extremely impressed with how well Rustbond was able to adhere to the old coating.
