

Location:

Port Allen, LA

Date of Application:

June 2007

Market:

Petrochemical

Substrate:

Steel

Surface Prep:

SSPC-SP 6 (Commercial Blast)

Exposure:

Exterior Weathering - moderate
industrial exposure - chemical
environment

Square Feet:

6000.0

Placid Refining

Area Coated: Exterior Coating

- First Coat: Carbozinc 11
- Second Coat: Carbomastic 15
- Third Coat: Carbocrylic 3359 DTM

Project Description:

Spheres in chemical plant. Carbozinc 11 was applied by fabricator on plate steel sections.

Coating Selection Explanation:

Weld areas were spot primed with Carbomastic 15 (SP3), and then total surface was topcoated with Carbocrylic 3359 DTM. Topcoat was chosen for dryfall properties. Location of sphere was close to high traffic roadway.
