industrial exposure - chemical
environment

Sabre MDFG Frac Tanks

Area Coated: Exterior Coating

- First Coat: Carbothane 8812
- Second Coat: Phenoline 309
- Third Coat: Phenoline 310

Project Description:

Sabre wanted faster application times and the ability to put on less coats. They also wanted a product that had a life expectancy of 5-7 years.

Coating Selection Explanation:

Carbothane 8812 DTM exterior and a single coat, (25 mils DFT) of Phenoline 309/310. Sabre saves the application time of two coats per tank, cost of additional coat and improved production. The coating system meets and exceeds the design life of said equipment
