Whlie Mfg Agricultural Sprayers

Area Coated: Exterior Coating

- First Coat: Carbothane 8812

Project Description:

Most of Mylie's booms and sprayers went to dealer's yards. If the products were not sold in less than 6 months, products were brought back for a fresh coat to address glossing and chalk problems.

Coating Selection Explanation:

Introduced the workhorse. Carbothane 8812 DTM over iron phosphate. Whlie loves the improved appearance and gloss retention without the need to recoat. They have improved their reputation in the market place.
