

**Location:**

West Monroe, LA

**Date of Application:**

July 2008

**Market:**

Pulp and Paper

**Substrate:**

Steel

**Surface Prep:**

SSPC-SP 7 (Brush Off Blast)

**Exposure:**

Exterior Weathering - moderate  
industrial exposure - chemical  
environment

**Square Feet:**

60000.0

## Graphics Packaging Maintenance Building

**Area Coated: Exterior Coating**

- First Coat: Carbocrylic 3359 DTM

**Project Description:**

Maintenance building exterior metal was coated with 2 coats of Carbocrylic 3359 DTM. The building is located inside of a paper mill in North Louisiana.

**Coating Selection Explanation:**

The substrate was abrasive, sweep blasted to remove any loose coatings and surface contaminants.

The 3359DTM was selected for its ease of application and excellent weathering properties.
