Exterior Weathering - moderate
industrial exposure - chemical
environment

TransMontaigne Tank 7125 Rehabilitation

Area Coated: Exterior

- First Coat: Carbomastic 15
- Second Coat: Rustbond HB
- Third Coat: Carbothane 134 HG

Project Description:

Project entailed application of an overcoat coating system to refurbish the tank exterior shell and cone roof.

Coating Selection Explanation:

Project entailed pressure washing existing coating & hand/power tool cleaning of existing corrosion/bare areas. The tank was spot primed with Carbomastic 15 followed by a full coat of Rustbond and Carbothane 134HG.
