## City Of New Orleans

**Area Coated: Exterior Coating**

- First Coat: Carboguard 635 HAR
- Second Coat: Carboguard 635
- Third Coat: Carbothane 134 HG
- Fourth Coat: Filler 47

**Project Description:**

This project was the first Targa barge of the contract. The was 290ft and the system was as follows: Two 10mil coats of Carboguard 635 HAR on the hull and two 6mils coats of Carboguard 635 with one coat of Carbothane 134HG on the decks and walkways, 47 filler was added for non-skid. The barge took 3 weeks to complete from start to finish.

**Coating Selection Explanation:**

No Major Problems

**Additional Information:**

The Contractor was impressed with how much more the Carboguard 134HG shined over the Ameron Urathane.
