

THE PROTECTIVE COATINGS PROFESSIONALS™

Product Case History

Location:

Hilton Head, SC

Market:

Fireproofing - Commercial (USA)

Substrate:

Steel

Surface Prep:

Clean & Dry

Exposure:

Exterior Weathering - moderate
industrial exposure - chemical
environment

Hilton Head Hospital

Area Coated: Exterior Coating

- First Coat: Nullifire S605

Project Description:

During construction it was established that the structural steel on this canopy required a 2 hour fire rating to meet local building codes. As aesthetics were an important consideration, the architect dismissed the use of sprinklers or cementitious products.

Coating Selection Explanation:

Nullifire S605 was chosen for its exterior resistance and UL Classification. It was topcoated with the full exterior coating system as tested by UL to give long-term performance and color retention.
