

Location:

Punto Fijo, ---

Market:

Fireproofing - Industrial (USA)

Substrate:

Steel

Surface Prep:

SSPC-SP 10 (Near White Blast)

Exposure:

Exterior Weathering - moderate
industrial exposure - chemical
environment

Maraven Refining

Area Coated: Exterior Coating

- First Coat: Pyrocrete 241

Project Description:

Universal Fabricators in New Iberia, constructed six modules which totaled 50,000 sq. ft. of structural steel that required a 3 hour U.S. 1709 high-rise temperature rating. Once the modules were constructed, J.L. Manta, Inc. applied the Pyrocrete 241 in a boxed design using plastic nosed corner beads. After application of the fireproofing, the modules were loaded onto barges and shipped to Venezuela where they were off-loaded and set into place.

Additional Information:

There was less than 1% damage to the Pyrocrete 241 during the shipping and unloading of the modules.
