

MARCH WINNER

# 75 Red Buckets of Surprises!

“ The first story is with the coating epoxy (Carboguard) 904. Our customers are very excited and satisfied with the performance in the field and how their cars have the best quality, aesthetic, and incomparable mirror effect.

The other story is to recognize the big and excellent support of Santiago Silva in the Monclova plant. Every time that we apply a new coating, he trains our blasters, painters, and inspectors about the specifications and methodology to apply. Santiago also helps us with continuous visits to clarify our doubts during the project and follow up on the (product) performance. ”

Julio Cesar Iracheta Garcia

Trinity Rail Monclova
